Projects

Vintage Value:

An E-Commerce site for vintage items was created using Full Stack Technologies and implemented Stripe API to securely collect user payment. Used React.js, Node.js, Next.js, JavaScript, and Stripe API.

- Distributed workload with teammates in accordance with sprint plans that were used for the project.
- Daily scrum meetings with the scrum master where daily work is presented, and suggestions are constantly solicited.
- Checks written code for compliance with industry standards and device compatibility.
- Uses web applications, scripts, and programming languages including HTML, CSS, JavaScript, and APIs to carry out assignments.
- Has a working knowledge of user interface, cross-browser interoperability, and fundamental web standards.

Health Care Website:

A responsive website created specifically for the client who wants to showcase his medical products on an actual website and give users more knowledge about products and compare it.

- Maintains a professional understanding of web development by tracking trends and participating in study groups.
- collaborating with team members to decide on the website's layout, content, and appearance.
- Observe and maintain the functionality of websites.
- Create a responsive and compatible website to reach the most users possible.

Volunteer and Youth Activity

Yogi Devine Society (YDS) – Canada   Jul 2021- Present

I am a member of the Canadian Yogi Devine Society. This group assists new students with a variety of tasks, including finding housing. I engage in a variety of activities, such as assisting recent immigrants in finding part-time employment and giving accurate information on using public transportation, meeting basic needs, and managing money.
